Experienced in working with both small and large teams consisting of designers, business analysts, system architects, developers, testers and executive product owners. Passionate about Microservice development, Cloud Foundry and competitive sports.

EXPERIENCE

Loblaw Company Limited (FDM Group), Toronto — Software Engineer

March 2019 - PRESENT

HealthWATCH – A Pharmacy Management System used in Shoppers Drug Mart Pharmacy to create prescription abiding with provincial guidelines and be compliant.

- Worked on transition of a monolithic application to microservice Spring boot application.
- Developed feature and microservice to make application loosely coupled.
- Deployed the developed microservice on Pivotal Cloud Foundry and used RabbitMQ and Spring Cloud Stream to communicate among various microservice
- Collaborated with different team member to create feature requirement. Communicated between various Agile teams to integrate different microservices together.
- Used latest Java libraries to develop code using Maven as build and dependency management tool.
- Initiated used of Docker to efficient deploy software packages.
- Utilized Bitbucket for code distribution, SonarQube for code analysis and Jenkins for code deployments.

TD Bank Group (FDM Group), Toronto — Java Developer

April 2018 – March 2019

Real Estate Secured Lending: HomeOwner's Journey - TD's web service enabling home seekers to apply for mortgage loans in Canada and The United States

- Developed REST API endpoints in Java using the dependency management and build tool Maven, and the Spring MVC framework for communicating user data from the front-end to the database host and back.
- Assisted team members in gathering and approving API story requirements.
- Cross-communicated between development teams to design blueprints of common Java classes and ensure they would perform correctly upon completion.
- Used Bitbucket for code distribution, SonarQube for code analysis, Jenkins for code deployments, and Postman for endpoint testing.

SKILLS

Java, Maven, Spring – SQL - Git, Bitbucket, Gitlab – RabbitMQ, Spring Stream Cloud, Pivotal Cloud Foundry - JIRA, Confluence

EDUCATION

FDM Group, Toronto — Computer Science in Enterprise Environments

February 2018 - April 2018

Completed Java, SQL and UNIX courses targeted for software development at investment banks

University of Windsor, Windsor — Computer Engineering

September 2016 – December 2017

Graduated with a Master of Engineering degree

Christ University, Bengaluru — Computer Science Engineering

June 2012 – May 2016

Graduated with a Bachelor of Technology degree
